Title: Outputting Results
Content: email your results, export results to Refworks, e-shelf, Novanet searching

Screen shot	Script
Title shot	Sometimes it's helpful to output or save your Novanet Search results to use for future research, or for bibliographies. You can do this by saving your searches as you go along, or by saving searches in bulk using the E-Shelf tool in Novanet. This tutorial will demonstrate both techniques.
Search results for "existentialism" in Keyword Anywhere	After searching you can save several items of interest to your E-shelf.
Select several items	Select the items you wish to save by checking the boxes.
Zoom to E-Shelf and click. Write a note "philosophy". Click on "My E-Shelf." Show results and zoom to note.	Then chose "submit marked records to E-Shelf" You have the option of organizing your saved items into categories by attaching a note to the selections. Click "Go" and Novanet will inform you that your results have been saved. To view your shelved items, click on My E-Shelf. The note you created will appear in the far right column of your E-shelf.
Click on "folder management" Call out Delete button. Call out Create Folder button.	Other ways of maintaining your E-shelf are available when you click on "folder management." You can delete items. Or you can create folders to organize your E-shelf into categories.
Back to e-shelf page Click "email/save/export"	Your E-shelf is only temporary. The results will last for the length of the Novanet session, after you close Novanet, the results will be deleted. To permanently save your items from your E-shelf you can email, save or export the list by clicking here.
Email Save Export screen Call out Email Click on GO	This screen allows you to specify how you would like the records to be saved. You can Email your results Or, if you click Go,
Click on Save	you can choose Save to display the results for printing or saving to a file...
Click on REFWORKS	You can also Export results directly to your Refworks account.

	For more information on how to use Refworks, see the libcast that addresses this topic.
Check some items from Novanet Results	To save items as you go along, rather than through your E-shelf, check the items you would like to save...
Click Email Save Export.	...and click "Email Save Export"
Email Save Export Screen	The same options are offered as through your E-Shelf. You can email, save, print or export results to Refworks.
End shot	<p>This has been a brief introduction to Exporting Results.</p> <p>If you need any other assistance please visit one of our reference desks or get online assistance with our LiveHelp service.</p> <p>You may also want to view some of our other libcasts on doing library research.</p>
